Shmuel De-Leon Energy Ltd

Lithium Rechargeable Batteries Cycle and Calendar Life Assessment Report

Lithium rechargeable batteries are used on many applications – How can we estimate cycle and calendar life? What are the parameters affecting it?

Report Content

Introduction
Why Rechargeable Batteries?
Cycle Life Usage on Rechargeable Cell
Rechargeable Lithium Batteries
Cell Internal Components
Cell Components Affecting Energy Density
Li-Ion battery electrode materials
Lithium Rechargeable Systems (By Cathode and Anode)
Rechargeable Chemistries table
Lithium Rechargeable Cells working mechanism
Lithium Rechargeable Separators & Electrolytes
Li-Ion Solid Electrolyte Interface (SEI)
Anode & Cathode Structure
Cell design for energy and power
Cell Sealing's
Internal Resistance
Voltage level definitions
Operating temperatures – What that is mean?
Li-Ion Cell Charging Profile
What is Shelf Life?
What is Cycle Life?
Self-discharge
What is Calendar Life?
What is Depth of Discharge (DOD)?
State of Charge (SOC)
Extreme Temperatures for Rechargeable Li-Ion Cells
Unofficial Industry Low - High Discharge Temperature Limit Definitions

Lithium Rechargeable Batteries Cycle and Calendar Life Assessment Report

Unofficial Industry Low - High Charge Temperature Limit Definitions
What Happen on Extreme High Temperatures
What Happen on Extreme Low Temperatures
High and Low Charging Temperatures and State of Charge
Cycle Life and Operating Temperatures
Factors influence lifetime
Charge - Discharge Power Effects
Cycle Life behaviour as Function of High Charge-Discharge Rates
How to Prolong Cycle Life
Ideal SOC Operating Range
How Long the Battery Will Continue to Operate?
Battery Anode Aging
Battery Cathode Aging
Battery Aging – Anode & Cathode Failure Mechanism
Aging at the cell level root causes
Ageing at the cell level effect of coating density
Aging Summary
Performance Uniformity Damage
The Sources of Battery Defects
Manufacturing Defects
Cell Manufacturers – Warning Signs
Battery Design Quality
Safety event will kill the battery – aspects of safety on battery service life
Cycle and calendar life estimation different technics – 6 typical models
2 Academic leading work/research from the last 2 years
State of the art battery service life predictions modelling
Lithium batteries – Accelerate life testing
Summary
