Li-ion Rechargeable Battery Cathode Technology & Market Review

Report Content

Li-Ion battery market is a multibillion growing market (15% and more in average every year).
Cell performance deeply related to kind of cathode material in use.
Cathode material responsible in average for more than 40% of cell cost.
A deep review of the world market brought us a list of 127 Li-Ion rechargeable Cathode makers.
The research include the full maker list with their web site address, country of origin, kind of cathode under production (LCO, LMO, NCM, NCA, LPF and their different variations).
The research include the 2016-2018 most important li-ion cathode academic review
The research includes detailed review of 8 cathode academic institutes developers
The research includes detailed review of 92 cathode makers and their products
