Improvements are needed in battery performance to meet an ever-growing demand from portable applications for military, medical, automotive and industrial electronics. Strong development efforts for Li/CFx cells with a high energy density (volumetric and gravimetric) are being pushed by the US Department of Defense. The market research will review several Li/CFx battery aspects (materials, cells, batteries and developers/manufacturers) and also provide a mid-term market forecast.

Report Content

Lithium primary cells
Why lithium
Lithium primary cells advantages & Limitations
Lithium primary cell groups
Lithium Passivation
Lithium primary battery applications
Li/CFx – The First Commercial Lithium Cells in the Market
Why Li/CFx?
Li/CFx chemistry
Li/CFx battery applications
Li/CFx materials
Cathode CFx materials makers/developers (9 companies)
9 CFx material makers/developers review
(Li/CFx) batteries advantages & limitations
Available Li/CFx & Li/CFx-MnO2 Cell Sizes
Li/CFx Spiral Cells High Discharge Current Limitations
Primary Lithium Spiral Cells Comparison table
BR (Li/CFx) vs. CR (Li/MnO2)
US Military Li/CFx Program Objectives
Li/CFx Next Generation Military Batteries
Li/CFx/MnO2 Mix Blend Cells
Li/CFx/MnO2 Ultralife Patent
Primary Lithium D-Size Spiral Cells For Military Applications table
Li/CFx Cells for Medical Applications
Lithium/Hybrid CFx/SVO
7 academic institutes to develop Li/CFx cells review
20 Li/CFx cells manufacturers/developers review
Fluoride Based Rechargeable Batteries
Summary
2011-2017 – Li/CFx patents review
